Subject Browse Hardware Environment

## Description of Problem or Suggestion:

Current hardware design has browse stored in the repository on archive tape media. This is inappropriate for data that will be often accessed, and must be rapidly retrieved. Also, placing such frequently accessed & retrieved data on a D3 tape media (for EDC & GSFC) is particularly inadvisable, because of tape wear & tape head wear concerns.

## Originator's Recommendation

Put browse data in appropriate hardware environment. Justify the choice made.
