Subject Location of product request handling (e.g. segmentation) in the system.

Description of Problem or Suggestion:

- It appears that product request handling (segmentation) is happening too late in the process.
- information useful for sorting/segmenting the request has been lost.
 - on demand requests are not able to reuse the same tools/functions to control processing.
 - subsetting/subsampling is not handled by DDIST.

Originator's Recommendation

Move the product request handling function from the DDIST to the to the SDSVR.

Do not forget on demand.
