Originator Ref	NA
Priority	2

Section 4.4.1.10

Page 4-67

Figure Table NA

Category Name Design-Data Server

Actionee HAIS

Sub Category

Subject What is a Working Collection"?

Description of Problem or Suggestion:

Either a statement is needed as to just what a "working collection" is, or the requirements should be reworded to use the term "working collection" in most if not all requirements.

Originator's Recommendation

Add text defining what is a working collection.

We will add the following definition of Working Collection to DID 304' glossary:

Working Collection: A client's current set of ESDT objects within a single Data Server. The Working Collection object provides the ability to iterate over this set to perform requested services. Any program or application that begins a session that accesses the Data Server is the client.
