Subject Reference to and/or access to user supplied data sets

## Description of Problem or Suggestion:

There appears to be no way in which a user can insert, for personal or wider audience use, a data set they have discovered without going through a complicated, time consuming, expensive interaction with DAAC personnel to insert the data set and its metadata into the ECS data dictionary.

## Originator's Recommendation

Provide the user with a local (i.e. at his/her workstation) mechanism to substitute for the ECS-wide data dictionary and provide the user with the tools to populate this mechanism with the essential metadata that will allow the user to access the data with ECS tools at his/her workstation.
