Review FOS
Originator Ref ACK #02
Priority 2

Section NA **Page** NA **Figure Table** NA

Category Name Design **Actionee** HAIS
Sub Category
Subject Spare disk capacity

Description of Problem or Suggestion:

The FOS is planning for spare disk capacity of 50%. Some missions (at PDR phase) provide initial spare capacity of 100% for ground disk space, even without the not well-defined evolvability requirements of the EOS mission. The spare capacity usually decreases (gets eaten up) as development moves into critical design phase and implementation.

Originator's Recommendation

Re-evaluate prudent spare disk capacity requirements.
