Category Name Design **Actionee** HAIS

Sub Category

Subject Playback telemetry data delivery to ASTER GDS

Description of Problem or Suggestion:

ASTER GDS requires that EOSDIS shall provide ASTER ICC with all ASTER playback telemetry data from EDOS just after contact.

HAIS Response Date 1/31/95

It is understood that the ASTER GDS requires the playback telemetry data. However, the requirement to supply this data to the ASTER GDS is not within the current ECS/FOS baseline. ASTER GDS would need to negotiate with EDOS for the receipt of the playback telemetry data.
