

# PDR RID Report

**Originator** Mike Rackley **Phone No** 286-2220  
**Organization** 510 FOS  
**E Mail Address** mike.rackley@gsfc.nasa.gov  
**Document** CSMS PDR

<b>RID ID</b>	<b>PDR</b>	<b>253</b>
<b>Review</b>	CSMS	
<b>Originator Ref</b>	FOS	
<b>Priority</b>	2	

**Section** Security Management **Page** YS-15 to YS-17

**Figure Table**

**Category Name** System-level

**Actionee** HAIS

**Sub Category**

**Subcategory ID**

**Subject** Integration of MSS and FOS security management roles

**Description of Problem or Suggestion:**

It is unclear how the MSS and FOS Resource Management Subsystem (RMS) will work together in performing security management within the EOC. For example, while the MSS may be able to determine if a user should be able to receive command control authority, it would seem that the FOS RMS would need to be involved to factor in logical string activity.

**Originator's Recommendation**

Document who is going to do what in this area. Decisions to be made that require FOS-unique knowledge, such as knowledge of logical strings and operating modes, should probably be handled by the FOS RMS.
