<b>RID ID</b>	<b>PDR</b>	<b>356</b>
<b>Review</b>	SDPS	
<b>Originator Ref</b>	Offline media	
<b>Priority</b>	↑ storage	

<b>Section</b>	<b>Page</b>	<b>Figure Table</b>
<b>Category Name</b> Design-Data Server		<b>Actionee</b> HAIS
<b>Sub Category</b> Off-line Storage		<b>Related RIDs</b>
		<b>Subcategory ID</b> 11
<b>Subject</b> Offline media ingest, storage and handling		

**Description of Problem or Suggestion:**  
It is not correct to assume that all ECS data will be stored online. There are a number of examples of data that may be maintained on offline media (e.g., backup data, some Version 0 data). The flows, software and procedures in the ECS, especially in the Ingest and Data Server subsystems, do not adequately address offline media.

**Originator's Recommendation**  
Design detailed data flows, software and operations procedures of the ingest and storage of media that is to be maintained offline.
