Sub Category

Subject DAR that initiates process

## Description of Problem or Suggestion:

Response to Kevin Schaefer seemed to imply that a DAR triggering a process(es) will automatically initiate a process for the scheduling package. My understanding is that in the package described, initiation of a processes that will be visible and managed by scheduler is manual. Additional code would need to be written to automatically insert the above process into the scheduled processing cycle.

## Originator's Recommendation

Verify that this is a correct interpretation of a custom code need and when this feature will be implemented. If it is not correct show how the scheduler and the DAR operate independently.

HAIS Response Date 5/10/95

DAR submittal does not automatically initiate the scheduling of a process to generate a product. Production requests to schedule processing are submitted separately from DAR submittals, although they can be linked together or associated so that the impact of changes to either can be assessed.
