Figure Table Figure 6.1-1

Category Name Status-Data Management

Actionee HAIS

Sub Category

Subject V0 Gateway

Description of Problem or Suggestion:

One way interaction with V0 IMS is described and pictured here. Later (sec. 6.5, p. 6-10,11, fig 6.5-1) two-way interaction is described.

Originator's Recommendation

This problem will probably go away with incorporation of V0 Client into Rel A. Please confirm this assumption.

HAIS Response Date 6/5/95

Actually two-way interoperability with V0 is planned for Release B. Interoperability for Release A is planned to be one-way from V0 client to Rel A services.

The documentation referring to V0 interoperability will be changed to reflect this planned Release A interoperability by CDR.
