Document ICD Between ECS and AM-1 Project Data Base

RID ID	PDR	474
Review	SDPS	
Originator Ref	IVV-KRM-09	
Priority	2	

Section 5.0

Page 5-1 - 5-23

Figure Table

Category Name Interfaces

Actionee HAIS

Sub Category

Subject Level of Detail

Description of Problem or Suggestion:

The records in section 5 are not sufficient to build or test the interface. Section 4.0 specifies the files that will contain the data for the project database and refers to section 5.0 for the details of the records. However, it appears that there is a one-to-one relationship between files and records.

Originator's Recommendation

Exact formats (down to the bit level), contents, order, method for encoding, and valid values need to be provided for record types, and if the details are documented in another document, then the document should be referenced. Valid record type for each file type should be specified, as well as, file naming conventions.

HAIS Response Date 6/30/95

The author correctly observes that information in Section 5 does not contain sufficient detail to build or test the interface. As a Preliminary document this ICD is allowed to omit considerable detail unlike the Final ICD that will be published at CDR. The Final ICD will contain sufficient detail to build and test all interfaces.
