Sub Category

Subject Difference between receive and ingest?

Description of Problem or Suggestion:

With respect to the series of requirements, from #S-DSS-10170 to S-DSS-10208, what is the difference between "receive" and "ingest"? Note that #S-DSS-10170 and S-DDS-10204 both deal with HTML documents, but one says receive and the other says ingest.

Originator's Recommendation

Either provide a statement of the difference between the two terms or edit the requirements to remove the difference.

In general, we have tried to use the terms "ingest" and "receive" in a consistent manner when drafting the L4s. "Ingest" refers to an ingest client accepting and possibly preparing data in format acceptable to the target data server. "Receiving" is a term that describes the process where a data server takes data in a format that is acceptable and inserts it into its collections.
