Figure Table NA

Category Name Design-Ingest

Actionee HAIS

Sub Category

Subject Input media restriction

## Description of Problem or Suggestion:

In #S-INS-00200, why is there the restriction to data stored on magnetic disk? Why can't the list of existing files be stored on a CD-ROM, or on magnetic tape?

## Originator's Recommendation

Take a second look at this requirement.

This requirement addresses network (electronic) ingest only. Therefore, it is assumed that the data source is a magnetic disk (with location ID, etc.) for data transfer. The user is provided with the capability to select given files for ingest from a list of files displayed on his screen. Ingest from media such as CD-ROM or tape is specified in Sec.4.5.1.4. This requirement will be clarified as necessary.
