<b>Priority</b>	2	

**Section** 4.6.2.7

**Page** 4-133

**Figure Table** NA

**Category Name** Design-Planning

**Actionee** HAIS

**Sub Category**

**Subject** \*\*or\*\* is not \*\*and\*\*

**Description of Problem or Suggestion:**

There is a possibility that the "or" in requirement #S-PLS-61270 could be read in such away that having both "man pages" and "printed documentation" fails to meet the requirement.

**Originator's Recommendation**

Rewrite the requirement so that the requirement is satisfied by an "and" condition.

Any requirements written with "or"s will not be interpreted as exclusive "or"s unless the context makes this interpretation obvious or it is specifically identified as such. Otherwise, either or both conditions may exist to satisfy the requirement.

It should also be noted that requirement PLS-61270 was inadvertently deleted in the March 1995 version of the L4 Requirements (DID 304) configured following PDR and posted on EDHS. This requirement will be reinserted in a future version of the document to correspond with the similar requirements IOS-60170, DMS-60170, DSS-60170, DSS-80170, DSS-90170, INS-60870, DPS-70183, and DPS-80155.
